

Artificial Intelligence and Machine Learning

Artificial Intelligence (AI) is the simulation of human intelligence by machines.
Machine Learning is a subset of AI that enables systems to learn from data.
Deep Learning is a subset of Machine Learning that uses neural networks.

Geoffrey Hinton is known as the Godfather of Deep Learning.
Geoffrey Hinton developed the Backpropagation algorithm.
Geoffrey Hinton worked at University of Toronto and Google.
Geoffrey Hinton won the Turing Award in 2018.

Yann LeCun invented Convolutional Neural Networks.
Yann LeCun works at Meta AI Research.
Yann LeCun won the Turing Award in 2018.

Yoshua Bengio is a pioneer in Deep Learning.
Yoshua Bengio works at University of Montreal.
Yoshua Bengio won the Turing Award in 2018.

Geoffrey Hinton, Yann LeCun and Yoshua Bengio are collectively called the Godfathers of AI.

OpenAI developed GPT-4 and ChatGPT.
OpenAI was founded by Sam Altman and Elon Musk.
ChatGPT is built on top of GPT-4.
GPT-4 uses Transformer architecture.

Transformer architecture was introduced in the paper Attention Is All You Need.
Attention Is All You Need was authored by Google Brain researchers.
